DEVCOM

Synchronized Persistent Army Experimentation (SPARX)

SPARX simplifies the process of connecting industry technologies with Army experimentation events enhancing the ability to transform the Army to ensure war-winning future readiness.

SPARX WILL:

- Streamline the application process for Industry into Army experimentation events

- Creates an Industry Technology Catalog of technologies for referral into various events

- Track SME assessments, outcome maturation, and technology progression throughout experimentation events

HIGHLIGHTS:

- Single submission format that can be used for multiple experimentation events

- Always open for technology submissions

- Ensures intentional technology experimentation alignment

- Provides tool for submitters to recommend appropriate experimentation event

Link to SAM.gov posting: https://sam.gov/op-p/0cecbed8fb4e439ba-027c2a335e71b3f/view

HOW DOES IT WORK?

- Look for the calling message on **SAM.gov**
  (search keyword: SPARX)

- Submission will be a fillable word document, submitted to the email address below

- Subject Matter Experts will review submissions and provide recommendations for potential experimentation event matches

- Upon event acceptance and completion, the Industry Technology Catalog will be updated with a closeout assessment
